

[Training for information security focus areas]

Each training focuses on a **single focus area** (e.g., password management, email use, ...). An individual user can be sent to **several trainings**. There is room for a **maximum of 50 users** in all trainings together. *For example:* 10 users sent to Password management and Information handling training (2×10) and 30 users sent only to the first training (1×30) means that you have filled all the places for training ($2 \times 10 + 1 \times 30 = 50$). Clearly **justify** your decisions in a sentence or two.

	Training for information security focus area	No. of users	Rationale
1	Password management		
2	Email use		
3	Internet use		
4	Social media use		
5	Mobile devices use		
6	Information handling		
7	Incident reporting
